

## HELPING YOU GROW

**Nufarm delivers the pinnacle in weed control with Terrian, a unique and versatile group G herbicide that is ideally suited for fenceline weed control, providing residual control for suppression of 22 hard to kill weeds.**

Terrain delivers excellent, economical residual weed control of a range of broadleaf and grass weeds including annual ryegrass, flaxleaf, fleabane and sow thistle. Terrian provides an alternate mode of action with no known weed resistance in Australia, making it an essential part of a herbicide resistance management strategy for fencelines.

### FEATURES AND BENEFITS

- New mode of action residual herbicide
- Performs well on a range of soil types from sand to clay
- Terrain provides up to 24 weeks of residual weed control.
- Safe to apply and use around trees and vegetation

**TERRAIN – FOR RESIDUAL  
FENCELINE WEED CONTROL**
